## Virtual Private Network (VPN)

When working remotely such at your home or on the road, you will want to utilize a Virtual Private Network (VPN). A VPN protects your IP address from a perpetrator and encrypts your data, so it is not readable. In this short 3-minute training video, at the [Protected Voices: Virtual Private Networks — FBI](#) website, we will learn how to better secure your business or home devices using a VPN.

Learn more about VPNs at [Virtual Private Network \(VPN\) Apps on Mobile Devices | FTC Consumer Information](#)
