Security Awareness Training is important for the School District staff and teachers. It meets both NIST and School Board policy requirements.

In Ohio, most schools do not train the student body in Security Awareness Training annually. During the school year, a proactive stance on data security will help with your district's safety program.

What is the Threat?

1. Ransomware Gangs
2. Nation – State
3. Organized Crime
4. Insider Threat
5. Untrained Employee

Cybersecurity Awareness training will help your school district meet the NIST Cybersecurity Framework, PROTECT (PR) function Subcategory PR.AT-1 data security control.

Awareness and Training (PR.AT): The organization's personnel and partners are provided cybersecurity awareness education and are trained to perform their cybersecurity-related duties and responsibilities consistent with related policies, procedures, and agreements.
